

The chart displays the daily count of COVID-19 cases in the Czech Republic. The x-axis represents time from March 2020 to January 2021, with labels every month. The y-axis represents the number of cases, ranging from 0 to 10,000. The data shows a period of low activity in early 2020, followed by a sharp increase starting in May, peaking in late May/early June at nearly 10,000 cases. This is followed by a decline and then a second, even higher peak in late July/early August, reaching over 14,000 cases. After a period of fluctuation and a decline in late August, there is a significant resurgence starting in late September, peaking again in early October at over 14,000 cases. The chart ends with a sharp decline in early November, followed by a slight uptick in mid-November.

Date	Number of Cases
2020-03-01	1,000
2020-03-15	2,500
2020-04-01	3,000
2020-04-15	3,500
2020-05-01	4,000
2020-05-15	8,500
2020-06-01	7,500
2020-06-15	6,500
2020-07-01	5,500
2020-07-15	4,500
2020-08-01	3,500
2020-08-15	2,500
2020-09-01	1,500
2020-09-15	2,500
